Intended Use

For use with suspended ceilings and dry lining in conjunction with various types of ceiling and wall systems.

Composition

The product consists of an extruded aluminium section which may (or not) be subsequently coated with polyester powder paints, or alternative finishes.

Health Statement

When subject to the normal purposes for which they are designed, these products do not present health risks nor hazards.

By their nature, these products may have sharp edges and corners, and the use of gloves when handling is recommended. When installing overhead it is advisable to wear head protection.

When cutting or welding these products, it is advisable to wear eye protection. Avoid ingestion or inhalation of any dust or fumes arising from such cutting operations and use a suitable face mask when necessary.

Metal is a good conductor of electricity and precautions should be taken to ensure contact with live power lines is avoided.

Precautions for Handling and Storage

No special precautions are necessary for normal handling and storage, and no health problems are to be expected from long term exposure during these operations.

The products should be kept dry at all times and stored in a dry environment.

Procedures in the Event of an Emergency

There are no special risks associated and the products do not constitute a fire hazard. The products are not generally ignitable.

Waste Disposal

Waste products are not hazardous and their disposal should be in accordance with local authority regulations.

Relevant Tests

None Applicable.

Measured Levels of Exposure of Operators When Using the Product

None applicable

Intended Use

For use as a support system in conjunction with various types of ceiling tiles.

Composition

The product consists of an extruded aluminium section (which may (or not) be subsequently coated with polyester powder paints, or alternative finishes), combined with a galvanised steel suspension carrier.

Health Statement

when subject to the normal purposes for which they are designed, these products do not present health risks nor hazards.

By their nature, these products may have sharp edges and corners, and the use of gloves when handling is recommended. When installing overhead it is advisable to wear head protection.

When cutting or welding these products, it is advisable to wear eye protection. Avoid ingestion or inhalation of any dust or fumes arising from such cutting operations and use a suitable face mask when necessary.

Metal is a good conductor of electricity and precautions should be taken to ensure contact with live power lines is avoided.

The galvanised steel carrier could have a presence of hydrocarbon rolling oil which may cause irritation of the skin during prolonged exposure. In such cases, the use of barrier creams and attention to personal hygiene is essential.

Precautions for Handling and Storage

No special precautions are necessary for normal handling and storage, and no health problems are to be expected from long term exposure during these operations.

The products should be kept dry at all times and stored in a dry environment.
